HOLMES SEED COMPANY
Harrisburg, Penn.

Satisfaction Guaranteed or Your Money Back

Should any seeds fail to please, we will refund the price paid or duplicate your order free

In presenting our 1912 Handbook of Seeds, we wish to call attention to the fact that we have eliminated a great deal of unnecessary descriptive matter which makes catalogues tedious and cumbersome, and have given the salient points of each variety in as few words as possible.

We also wish to thank our customers for their kind patronage in the past and respectfully solicit a continuance of their favors. From those who have not as yet favored us with orders, we respectfully solicit a trial. All orders entrusted to us have our prompt and careful attention.

OUR RESPONSIBILITY AND STANDING.

Holmes Seed Company is incorporated under Pennsylvania laws. We refer you to Harrisburg National Bank or Security Trust Company of Harrisburg, to Dun's and Bradstreet's Mercantile Agencies, and to any responsible business house in this city. We feel sure that when you have once bought from us, you will become our permanent customer. We give you good seeds and plants at fair prices. You get your money's worth always. If a mistake is made, it is our desire to correct it; this you may depend on.

WE DELIVER FREE. The prices quoted include prepayment of postage on all seeds, plants or bulbs, etc., whether they may be sent by mail, express or freight. If you prefer to deal with your local store, ask for Holmes' tested seeds. If he does not have them, then send direct to us.

WE GUARANTEE OUR SEEDS to be pure and of strong vitality. If from any cause they should fail to prove of such quality, we will refill the order or refund the price paid upon receipt of satisfactory evidence that such is the case. But The Holmes Seed Company do not give, nor are any of their agents or employees permitted to give, any warranty, expressed or implied, as to descriptions, quality, productiveness, or any other matter of any seed, bulb or plant they send out, beyond the guarantee published in this catalogue, which is very liberal, and will not be in any way responsible for the crop beyond the replacing of the seeds or returning the money paid. If the purchaser does not accept the goods on these terms, they are at once to be returned. Good seeds, fair prices, honesty, "money back"—our policy.

DISCOUNT AND HOW TO REMIT. If your order is for one dollar or more, deduct 20 per cent. from the total value at catalogue prices of seeds by the packet or ounce. This does not apply to larger quantities. We request that remittance to the amount of each order be sent with the order, and guarantee that full value will be received in good order.

HOLMES SEED COMPANY.

Ornamental Department

If you want complete descriptions with suggestions for placing and culture, ask for special book.

SHADE TREES

- BEECH, Purple.** Graceful, tall, deep purple, changing green, healthy. 3 to 4 ft. \$1.00, 4 to 5 ft. \$2.00, 5 to 6 ft. \$2.50.

We deliver all seeds to any post office or station in United States (by mail, express or freight at our option) unless otherwise stated in our advertising matter or letters.

[illegible]

When you are sending us an order, if you can secure an order of equal value from a friend and will send the two together, you may deduct 20% from the total cost of your seeds. This does not apply to field seeds, potatoes or onion sets, but to all else.

HOLMES' SEEDS BEST—WHY?

THE seeds offered by Holmes Seed Company are nearly always superior to almost all others that can be had. They are the very best the soil can grow—not only in Pennsylvania or in America, but in Europe or anywhere in the world. Experience and accurate knowledge enable us to know what is good and what is not, and we choose with the greatest care every bit of seed we sell, and bring it from wherever it is grown, no matter what the distance.

ARTICHOKE Artischoke Articiocca Karczocky

CULTURE.—May be grown from seed sown in April, or from suckers, taken from established plants. The seed can be sown in beds and the plants transplanted to rows 4 feet apart, 18 inches between. Three ounces of seed will sow 100 yards of row.

Large Green Globe. Grown chiefly for unripe flower heads, delicious.....

By Mail, Postpaid
Pkt. Oz. ¼ lb.
\$0.05 \$0.25 \$0.85

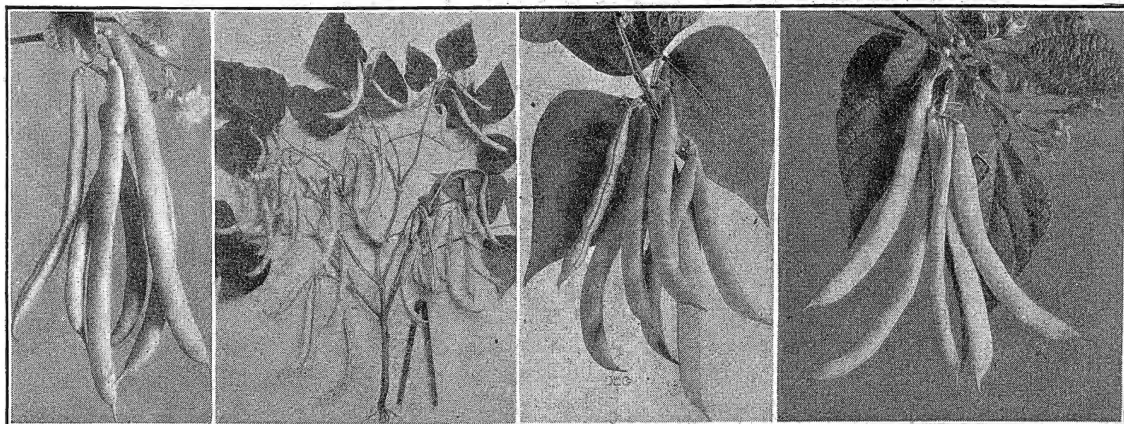

ASPARAGUS Spargel Sparagio Szparagi

CULTURE.—Sow in March or April, in rows 1 foot apart. When two years old transplant into permanent beds. Set the plants in rows from 3 to 4 feet apart and 2 feet in the row, and cover gradually during the season to 6 or 8 inches. On approach of Winter cover with manure or straw. One ounce will sow 40 feet of drill.

BEETS

Rübe Barbabietola
Buraki

CULTURE.—The soil should be rather light and thoroughly enriched with manure. Sow in Spring as soon as the ground becomes fit, in rows about 1 foot apart and 2 inches deep. For main crop sow first week in May; for Winter sow in June. Thin to 5 or 6 inches. One ounce to 50 feet of drill. Sow five pounds per acre.

Our selected stock of Beets are uniform and of fine quality. French grown Beets seed is far superior to that grown in America, producing Beets that are uniform in every respect. Ours is French.

White and Yellow Belgian. Used principally for stock.....	.05	.20	.30	1.00

Copenhagen Market Cabbage

CABBAGE

Kopfkohl Corvolo coppuccio
Kopusta

(Pure American-Grown Tested Seed)

For years we have given the selection of Cabbage seed particular attention. We have selected only such varieties as are certain to be of great value to all growers. Our seed is from stocks carefully selected and tested on Long Island.

CULTURE.—Sow in hotbeds in February, or still better, from September 10 to 20 and Winter the plants over in a coldframe. Transplant March 15 to April 15 about 20 inches apart each way, in rows 2 feet wide. For second early crop, sow seeds of early kinds early in April and plant out in May. For a late crop, sow early in May and plant out in July; the plants 2 and the rows 3 feet apart. One ounce will produce 1,500 to 2,000 plants.

Extra-Early Varieties

	By Mail, Postpaid			
	Pkt.	Oz.	¼ lb.	Lb.
Allhead Early. Flat head, coming in with Early Summer; much larger.....	\$0.05	\$0.20	\$0.60	\$1.75
Copenhagen Market. (New.) Very early. A type of Flat Dutch; large solid head, weighty, low stem, an excellent keeper10	.50	1.75	6.00
Early Charleston Wakefield. Largest early Cabbage, which was bred from the Early "Jersey" Wakefield05	.20	.60	2.00
Early Flat Dutch. Sure header, head weighing from 10 to 12 pounds.....	.05	.20	.60	2.00
Early Jersey Wakefield. (Holmes' Special Strain.) Pyramidal heads with blunt peaks; remarkably solid05	.25	.75	2.50
Early Spring. (New.) Earliest round, flat headed; quality unexcelled.....	.10	.30	1.00	3.25
Early Winnigstadt. Medium early, large pyramidal heads; excellent.....	.05	.20	.60	1.75
Early York. Very early, producing small, oval-shaped heads05	.15	.60	1.75
Extra-Early Express. Earliest of French Cabbage; small, pointed head.....	.05	.15	.60	1.75
NEW LARGE HOLMES' EARLY. Heads are large, globe-shaped, finely ribbed, and of a yellowish green color; also known as No. 138.....	.10	.50	1.50	5.00

Second-Early, or Summer Varieties

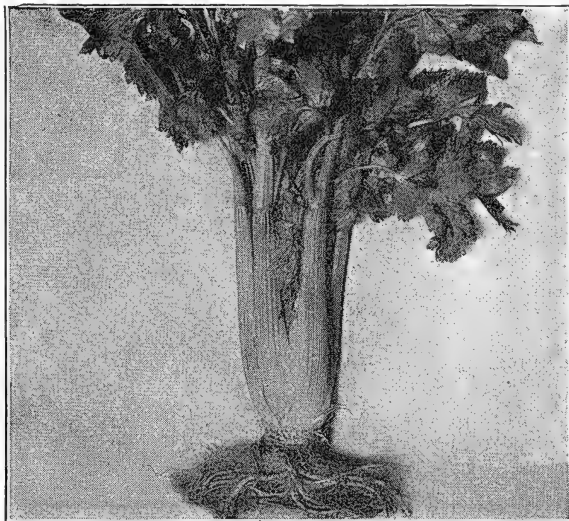

All Seasons (Vandergaw). One of the finest05	.20	.75	2.00
Early Summer. Large, solid head; about 10 days later than Wakefield.....	.05	.20	.75	2.00
Fottler's Improved Brunswick. Heads large, flat, solid; sure-header.....	.05	.20	.75	2.00
Glory Enkhuizen. Round early, extra fine, good size05	.25	.75	2.50
Limited Mail. Superb second-early variety. Hard, pointed heads, good size...	.05	.20	.75	2.25
Stein Early Flat Dutch. Excellent variety for Winter use.....	.05	.20	.75	2.00
Succession, Henderson's. Conceded to be the grandest Cabbage in existence for either Summer or Winter use05	.20	.75	2.00

Late, or Winter Varieties

Autumn King, Henderson's. Enormous solid heads; interior crisp, fine-grained white; splendid keeper05	.25	.85	2.50
DANISH BALLHEAD or HOLLANDER. Has few equals for Winter use. Heads round, 8 to 10 inches in diameter.....	.10	.30	.80	2.75
DANISH ROUNDHEAD. Heads unusually solid, beautifully white when trimmed. Splendid keepers. Good variety to ship; short stem.....	.10	.40	1.00	3.50
DANISH RED STONEHEAD. Vigorous, hardy, sure heading; large, solid, heavy, dark red clear through10	.50	1.50	5.00
HOLMES-HOUSE. Few other varieties can approach the Holmes-Houser in smallness of heart, keeping qualities, size, productiveness, solidity, flavor and fine grain. Note: It is necessary to plant out this Cabbage two weeks earlier than any other late sort, as it requires this much longer to mature than other late varieties10	.50	1.50	5.00
Holmes Perfection Late Flat Dutch. Our improved strain of this Cabbage will be found very superior05	.20	.75	2.00
Perfection Drumhead Savoy. Largest heading; home use and marketing.....	.05	.20	.75	2.00
Red Dutch. For pickling05	.20	.75	2.00
Short-Stem Drumhead. Selected strain; ripens early.....	.05	.20	.60	1.75
Surehead. Fine large solid heads with few outside leaves.....	.05	.20	.75	2.00

Holmes' Improved Early Snowball Cauliflower

Holmes' New Winter Celery

CAULIFLOWER

Blumenkohl Covoiofiore
Kalafiory

CULTURE.—For Spring and early Summer crop sow in March or early in April in hotbed, transplant to coldframe when sufficiently large, and to open ground as soon as danger of frost is over. For late crop sow at same time as for late Cabbage. One ounce of seed will produce 1,000 plants.

DANISH GIANT, or DRY WEATHER. Heads are pure white, large, solid, and of superior quality
Extra-Early Dwarf Erfurt. Good-sized heads; fine for open ground Fall crop
Holmes' Improved Early Snowball. A grand Cauliflower, for forcing, cold-frame, or open ground
Veitch's Autumn Giant. A large-growing late variety

CELERY

Sellerie Sedano
Selry

CULTURE.—Sow in a finely prepared seed-bed, and keep the bed moist. In setting, prepare shallow trenches, 6 inches deep and 4 to 6 feet apart, the plants 6 inches apart, cutting off the outer leaves and pressing the soil firmly about the roots. Good plants may be set out as late as middle of August. One ounce will produce 4,000 plants. 1 pound of seed for producing sufficient plants for an acre.

These grow quickly, blanch easily and are especially adapted for Fall and early Winter use.

Golden Self-Blanching. American stock
HOLMES' NEW CELERY. The largest most solid ribbed and nuttiest flavored celery grown. Excels by far the Giant Pascal. 5 pkts. \$1.00
Holmes' Scarlet Plume. Practically identical with White Plume; solid, stringless, flavor delicious, crisp and nutty
HOLMES' SELECTED WHITE PLUME. Earliest variety grown; can be blanched for the table in September
IMPROVED GOLDEN SELF-BLANCHING. (Selected.) French stock. Valuable early variety; flavor rich
NEW COLUMBIA. Early maturing, stocky and heavy. Resembles Golden Yellow Self-Blanching
SNOWWHITE. (New.) Pure white, self-blanching variety; rich flavor; heavy

CELERIAC (Turnip-Rooted Celery)

Knoll-Sellerie Sedano-ropa Brukwiana

Large Turnip-like roots which keep well for Winter use. Fine cooked, for flavoring soup or sliced and used as a salad.

Large, Smooth Prague. Almost round, uniform, smooth-skinned; free from side roots

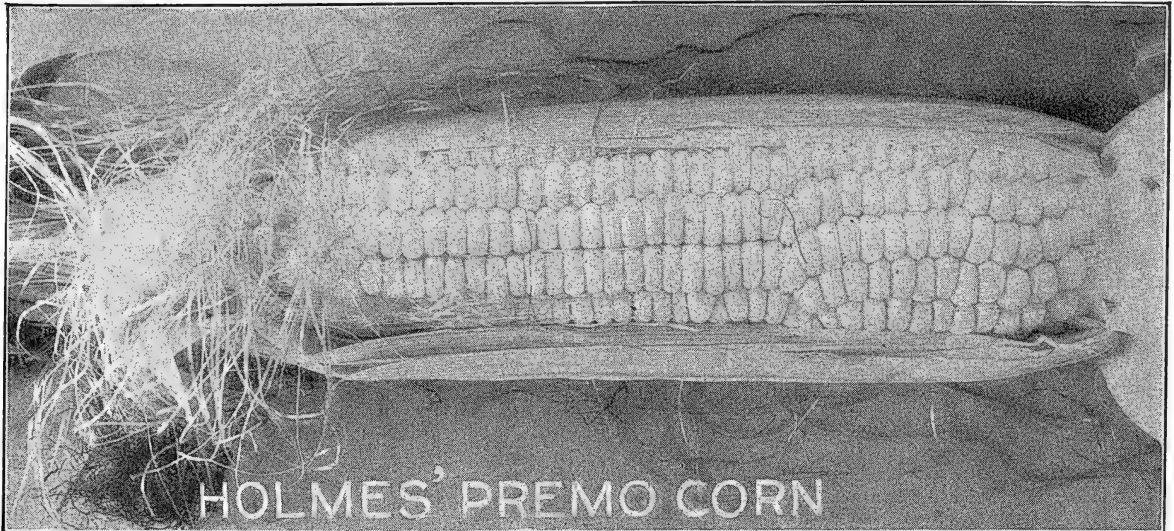

Pkt.	Oz.	¼ lb.	Lb.
\$0.10	\$0.30	\$1.00	

CHICORY

Cichorienwurzel Cichoria selvatica
Cukorya

Large-rooted, or Coffee. Largely used as an adulterant or substitute for Coffee.

Pkt.	Oz.	¼ lb.	Lb.
\$0.05	\$0.15	\$0.35	\$1.00

SWEET, or SUGAR CORN

Mais
Kukurudza

CULTURE.—Sugar Corn requires a good soil and a warm situation. Begin for first early by planting the early varieties about May 1, and for a continuous supply all Summer make plantings about two weeks apart, from May 1 until late July, first planting early varieties, then later ones. Plant in rows 3 feet apart each way. One quart for 200 hills, 8 to 10 quarts in hills for an acre.

Liberal pkts. 10 cents each, except where noted.

First-Early Varieties

	By Mail, Postpaid		By Express or Freight, Not Prepaid	
	Pt.	Qt.	Qt.	Pk.
Early Adams, or Burlington. Robust; early; productive; handsome ears for marketing, but of inferior quality.....	\$0.20	\$0.35	\$0.20	\$1.25

Philadelphia Early Dutch Butter. Heads very compact; for forcing05	.15	.35	1.15
Philadelphia White Cabbage. Large-headed Summer variety05	.15	.35	1.15
SALAMANDER. Good-sized, compact and tender heads, creamy white inside, rich buttery flavor05	.15	.40	1.25
Tennisball, Black-seeded. Very early, small, hard-heading variety05	.15	.35	1.00
Thick Head Yellow. Extra fine, large Summer variety05	.15	.40	1.25
Yellow-seeded Butter. Large, dense, yellow head, crisp, tender; fine flavor05	.15	.35	1.00

Curled or Cutting Lettuce

This type does not form compact heads, but large masses of curly, crisp leaves, which are practically everbearing, as they keep growing after picking; the best of these are:

Black-seeded Simpson. Large, loose heads; curly, yellow leaves05	.15	.40	1.25
Early Curled Silesia. One of the best cutting varieties05	.15	.40	1.25
Early Curled Simpson. Yellowish green; curly; earlier than head Lettuces05	.15	.40	1.25
Early Prize-Head. Large, loose heads, stained red; curled05	.15	.40	1.25
HOLMES' IMPROVED GRAND RAPIDS. Large, compact bunches of light, finely curled golden foliage; delicious10	.20	.60	2.00
The Morse. Light green; hardy. Superior to all05	.15	.40	1.25
Tomhannock. An upright Lettuce; tinged brown05	.15	.40	1.25

Cos Lettuce

Cos, or Romaine. (New.) Long-standing, solid hearts; bright golden yellow; crisp; tender05	.15	.40	1.00
Paris White Cos. A popular old variety05	.15	.35	1.00

MUSKMELONS

Melone Popone
Melon

CULTURE.—The hills should be 3 to 6 feet apart each way, according to richness of soil. Mix well with the soil in each hill a couple of shovelfuls of thoroughly rotted manure; plant 8 or 10 seeds in each hill early in May; thin out to three or four plants to the hill. One ounce for 60 hills. Two and one-half pounds per acre.

Five Special Varieties

	Pkt.	By Mail, Oz.	Postpaid ¼ lb.	Lb.

New Dwarf Champion Pea

Prolific Early Market Pea

PEAS

Erbisen Pisello
Groch

CULTURE.—For market, sow in single rows 1 inch apart and 2 to 3 inches deep, rows from 2 to 4 feet apart. In garden, sow in double rows 6 to 8 inches apart. Begin sowing extra-early varieties as soon as the ground can be worked in March; for a succession, every two weeks until June. One quart to 100 feet of drill. One and one-half to two bushels per acre.

Those prefixed with a * are wrinkled varieties.

Choice Varieties

Liberal-sized packages of any variety, 10 cts.

- HOLMES' PEDIGREE EXTRA-EARLY.** Grown in the far North and with the selection of the earliest and choicest vines, this strain is so improved that it fully bears out our claim as one of the earliest, most prolific and even strains in existence, maturing so well together that sometimes a single picking will secure the entire crop. Vines vigorous and hardy, 2 to 2½ feet high, bearing abundantly.....
- *NEW DWARF CHAMPION OF ENGLAND.** Hardy, robust, vigorous; handsome green pods; quality unsurpassed. Height 26 inches.....
- *NEW LATE PEA, ALDERMAN.** Fine, second-early wrinkled Pea. About 3½ feet high, producing an abundance of very large, dark green pods, filled with immense peas of delicious flavor.....
- NEW PEA, AMBER.** (Called Large Alaska in the South.) Height 18 to 20 inches, dwarf; stocky; vigorous; dark green. Just the Pea for the market or home gardener.....
- *NEW PEA, GRADUS.** (Also called Early Telephone.) Ranks with any early variety. Pods measure 4 to 4½ inches, nearly round, and well filled with eight to ten large, handsome peas; melting and sugary, retaining when served its bright, vivid green.....
- *NEW PEA, HOLMES' MASTERPIECE.** (Extra-Early Large-Podded.) We believe this to be one of the finest and most prolific large-podded Peas ever introduced. Pods contain 8 to 10 perfectly formed peas.....
- *NEW PEA, THOMAS LAXTON.** Large pods; delicious; matures as early as the extra-early smooth Peas; being wrinkled, is much sweeter.....
- *NOTT'S EXCELSIOR.** One of the sweetest grown; very prolific; dwarf.....
- PROLIFIC EARLY MARKET.** Produces 30 to 50 per cent. more Peas than any other early variety. Pods one-fourth to one-half longer than any of the extra-early types. Seed somewhat wrinkled.....
- *SUTTON'S EXCELSIOR.** An early dwarf wrinkled Pea in the front rank for earliness, yet with much larger, handsomer pods than any other dwarf wrinkled. Height 12 to 14 inches; yields in great abundance, long, broad, straight, pale green pods.....

RADISHES

Radies Ravenollo
Rzodkiew

Our Radishes are French-grown; being sown in beds and transplanted, we are positive of having straight sorts.

CULTURE.—Radishes delight in light, rich, mellow soil. For very early use, sow in a gentle hotbed in January, and continue sowing every two weeks in drills 10 inches apart, thinning to 2 inches apart. One ounce will sow 100 feet of drill. Eight to ten pounds per acre.

SALSIFY (Vegetable Oyster)

Haferwurz Sassefricu Jarzynowa

CULTURE.—It succeeds best in light, well-enriched soil. Sow early and quite deep. The roots are perfectly hardy and may remain out all Winter, but should be dug early in Spring. One ounce for 75 feet of drill. Ten pounds per acre.

Large White. Common variety; medium-sized, smooth; flesh white..... Pkt. Oz. ¼ lb. Lb.
Mammoth Sandwich Island. Larger, and less liable to branch than Large White..... By Mail, Postpaid

Pkt.	Oz.	¼ lb.	Lb.
\$0.05	\$0.10	\$0.25	\$0.90

SQUASHES Kürbiss Zucca

Miekuzr

BOSTON MARROW. Fall and Winter variety; large; oval form; skin thin; bright orange, with netting of light cream color, flesh rich salmon-yellow; fine-grained; excellent flavor..... Pkt. Oz. ¼ lb. Lb.
Fordhook. Early; sweet; dry; good Summer variety; oblong..... By Mail, Postpaid
Golden Custard, or Yellow Bush (Cymlin). Mammoth scalloped bush; extra quality.....
GOLDEN HUBBARD. A true Hubbard except in color, which is bright red. Wonderfully productive, fruits weigh 6 to 8 pounds; shell warty and strong; flesh deep orange to shell; cooks very dry; good flavored.....
IMPROVED HUBBARD. One of the best Winter Squashes; flesh bright orange-yellow, fine-grained, very dry.....
MAMMOTH WHITE BUSH SCALLOP. Fruit beautiful, clear waxy white; superior in size and beauty.....
MAMMOTH YELLOW SUMMER CROOKNECK. Vine larger and stronger than Summer Crookneck and producing fruit fully twice as large, deeper colored and with rough surface.....

SPINACH Spinat

CULTURE.—Sow in early Spring in drills a foot apart, every two weeks for a succession, and thin out for use. For Fall use, sow in August; for Winter, in September. Cover with straw or leaves in Winter. Varieties prefixed * may be sown in the Fall for Spring crop. One ounce will sow 100 feet of drill. Twelve pounds per acre in drills.

***Bloomsdale, or Norfolk Savoy.** Fall planting; fleshy; curled; hardy..... Pkt. Oz. ¼ lb. Lb.
Giant Eskimo. (New.) A variety we imported from Japan; very large.....
LONG SEASON. Can be grown successfully in hot weather without going quickly to seed—a merit possessed by few others. Leaves are very dark green, and grow in a thick rounded cluster; tender and succulent. Leaves remain fresh and crisp for a considerable time after cutting.....
Long Standing. Excellent; compact; thick, fleshy, dark green leaves.....
New Zealand. Abundant through the Summer. Never cooks stringy.....
Round-Leaved. Thick, round, succulent leaves.....
***Thick-Leaved.** Produces large, thick, bright green, crumpled leaves.....
Victoria. Very heavy, broad, deep green leaves, crumpled.....

Tomato—Holmes' Early Wonder

TOMATOES

Liebesapfel Pomo d'Ora
Pomidor

All our Tomato seeds are from seed stocks carefully selected. We challenge comparison with any offered.

CULTURE.—Tomatoes do best on light, warm, not over-rich soil. Sow in hotbeds from six to eight weeks before they can be set out-of-doors; when the plants have four leaves transplant into shallow boxes or coldframes, setting them 4 or 5 inches apart. Set out-of-doors as soon as danger from frost is over. The fruit will be better in quality if the vines are tied to trellis or stakes. 1 oz. for 1,500 plants; ¼ lb. for an acre.

	By Mail, Postpaid			
	Pkt.	Oz.	¼ lb.	Lb.

Ponderosa. The largest Tomato of all.....	.05	.35	1.00	3.50
SPARKS' EARLIANA. Remarkable for earliness, large size, handsome shape and bright red color; solid; fine quality.....	.05	.35	.85	3.00
STONE. Fruit round, apple-shaped, very large, deep red; heavy.....	.05	.35	.75	2.75
Trophy. Extra selected; an old favorite.....	.05	.30	.75	2.75
Trucker's Favorite. Reddish purple; fleshy; vines strong and vigorous.....	.05	.30	.75	2.75
Yellow Plum, Yellow Pear, Red Pear. For preserving.....	.05	.35	.85	3.00

TABLE TURNIPS

Weisse Rübe Navone
Rzoper Crukiew

In Fall and Winter, stock need Turnips and Rutabagas to keep them in good condition. There are a great many varieties, but our list comprises the best for the garden or farm.

CULTURE.—Sow half an inch deep in rows about two feet apart or sow broadcast. Weed and thin out, so the young plants will not be checked and injured. Get Spring and Summer crops started very early. In the Middle and Western States, sow for Fall and main crop from middle of July to last of August. One ounce for 100 feet of drill. Two pounds per acre broadcast.

White-Fleshed Varieties

	Pkt.	Oz.	¼ lb.	Lb.
COW HORN, or LONG WHITE. Carrot-like in form, slightly crooked. Delicate and well flavored; valuable as a market sort for Fall and early Winter, also for turning under.....	\$0.05	\$0.10	\$0.25	\$0.75
EARLY PURPLE-TOP STRAP-LEAVED. Early; favorite for table use; medium size; flesh white.....	.05	.10	.20	.50

RUTA-BAGA (Russian or Swedish Turnip). 2 to 3 lbs. to acre.....				
Improved American Purple Top. Old popular standard; rich flavor.....	.05	.10	.20	.50

Vegetable Plants and Roots

We make a specialty of growing and supplying market-gardeners and private gardens with the very best, **strong, well-rooted, transplanted** vegetable plants in any quantity. While we grow enormous quantities of all varieties, the demand for our plants is always greater than our supply. For this reason we advise you to order as early as possible. To the dozen prices add 6 cts., if wanted by mail. The price per 100 in flats means that we will ship them by express still growing in these flats or boxes. The price per 100 out of flats means we will ship the plants by express, securely packed in moist moss, express charges to be paid by the purchaser. The price per 1000 or 5000 means by express, charges to be paid by purchaser.

Choice Lawn Grass Seed Mixtures

Making and Caring for the Lawn

Preparing and Manuring the Ground. In making a new lawn, all grading, tree planting and laying out of walks and drives should be done first. The ground should be thoroughly dug or plowed to a depth of 10 or 12 inches, after which some good fertilizer—pure ground bone is especially recommended—should be applied at the rate of 600 to 800 pounds per acre. The ground should be fine and perfectly smooth and even.

Sowing the Seed, Rolling and Weeding. The best time for sowing grass seeds is in Spring, from February to May, or if in Fall, from September to November, using on small plots at the rate of one quart of seed to each 15 square feet, and for large lawns, golf links, tennis, cricket and croquet grounds, use at the rate of eighty pounds of seed per acre and for putting greens, 100 pounds of seed per acre. After the seed has been sown broadcast the ground should be thoroughly rolled; or, on small places, beaten with the back of a spade to "firm" the surface and press the seed into the soil. Annual weeds, natural to the soil, will appear before the young grass becomes established; none of these should be allowed to ripen their seeds.

Renovating Old Lawns. This should be done either in the Spring or early Fall, by raking the soil where bare spots occur, and sowing seed, taking care that it is not covered too deep, and also to roll or pat the surface smooth with a shovel.

Cutting, Feeding and Watering. When the grass has attained a height of 4 inches it should be mown, care being exercised not to cut it too close. Frequent rolling and mowing will make the turf close and compact, strengthen the grass and render the lawn smooth and attractive. Lawns require frequent feeding and watering to keep up their vigor. We recommend **Holmes' Lawn Dressing** as the best fertilizer for nourishing lawns.

Top-dressing in Fall. A coating of wood ashes and ground bone in the late Fall is very beneficial and gives the lawn a good start in the Spring. It is also advisable to roll the lawn after the last cutting in the fall; it prevents much of the young growth from freezing out at the roots.

HOLMES' TERRACE MIXTURES. A mixture of grasses best adapted for sloping ground and terraces. Has deep, spreading roots that hold embankments and cover terraces with a beautiful green turf.....	.30	.55	1.35	5.00

Holmes' Special Grass Mixture

For Permanent Pasture and Hay

Our famous mixture is becoming more generally used each season by progressive and successful farmers who desire permanent pasture. Its formula is based upon years of successful experience. It thrives well on all soils and is not seriously affected by the different climatic conditions. Not only pasturing well, it can be cut for hay and will make excellent grazing afterward. If not pastured, it will produce two heavy crops of hay in a season, doing better than Timothy. By all means plow up and seed those old worn fields. You can soon be cutting crops from HOLMES' PERMANENT PASTURE MIXTURE. Sow 50 pounds to acre. In ordering state whether for light or heavy soil. Should you desire a special mixture for renewing old pastures, etc., write us and we will give information. Lb. 25c., by mail, 35c.; bus. of 15 lbs. \$2.50, bus. of 20 lbs. \$3.50, 100 lbs. \$15.00.

Holmes' Superior Re-Cleaned Clover Seeds

ALSIKE, or HYBRID CLOVER. The hardiest of all. Adapted for permanent pastures or hay crop. Thrives equally well on wet or dry soil. Blossom-heads much liked by bees. Sow 10 to 20 lbs. per acre in Spring or Fall...
MAMMOTH, or PEA-VINE. Grows much taller than Red Medium...
RED MEDIUM. Common Red Clover...
WHITE DUTCH CLOVER (*Trifolium repens*). Thrives in almost any soil and climate. Low, creeping growth and most valuable in pasture mixtures and green, velvety lawns. Not suited for making hay...

The prices on all Field Seeds, Grasses, Clovers, etc., are liable to change without notice. Write first for quotations, which will be the lowest market values.

Wood Meadow Grass (<i>Poa nemoralis</i>). Adapted for lawns or pastures	14	6.00	.45	40.00

Alfalfa, or Lucerne Clover

Alfalfa gives more cuttings and a larger tonnage to the acre than any other clover. Sown in Fall during September, cuttings commence as soon as it attains a fair growth, before it comes into bloom. With seasonable weather it will give two or three cuttings throughout the first year. Will not succeed on wet soils. Roots are very long, penetrating the ground until they strike water, making it extremely valuable in dry seasons. Sow 20 to 30 pounds of seed per acre. Lb. 35c., postpaid; by freight or express, lb. 25c.; bushel 60 lbs. Write for prices.

Crimson Clover

Can be used as a Winter and Spring grazing crop; makes a good hay crop; best of early green feeds; prevents the Winter leaching of the soil. Write for prices.

Special Grass and Clover Mixture for Various Uses

We put up mixtures for shady places, golf course mixtures, terraces and steep slopes, putting greens, or for soils in which certain peculiar conditions exist. We shall be pleased to quote prices on any special mixtures, and give any information desired.

Holmes' Extra-Selected Farm Seeds

We have given this branch special study, exercising the greatest care in growing and securing seed of the highest standard in purity and quality. The care exercised in selecting our seeds has given Holmes' Field Seeds an enviable reputation, and to-day our house is recognized as headquarters for the most reliable Field and Grass Seeds. For Insecticides and Weed Killers see third cover.

Holmes' Thoroughbred Field Corn

Our seed is well cured and true to name. It pays to renew your seed stock of Field Corn. Do not inbreed. Varieties offered have all been grown from finest selected stock seed. Long grains, small cob, long ear, well-filled tip, well-filled butt, grains uniform, vigorous stalks, two and three perfect ears to each stalk—these are some of the important things to watch in getting seed corn. Even the stalks from which seed ears are pulled should be carefully chosen. All of our seed is grown, harvested and raised with these things in mind, and it is good seed in every way.

Timothy Seed

Holmes' "Eclipse Brand." Strictly Minnesota-grown. See our samples. Market changes. Before ordering ask for prices.....

8.50

Manurial Crops

The farmer who is getting poor yields because of impoverished soil is doing a great injustice to himself. The chief thing it needs is organic matter, and if he cannot afford to give enough of this in the form of manure, he can afford to grow and turn down certain good cover crops for fertilizing. Chief among them are the legumes and members of the pea and bean family. The clovers of various kinds are beneficial as soil renewers. The poor man who would enrich his soil should do so, not by expensive commercial fertilizers, but by growing legumes and turning them down. He can then add lime, phosphoric acid in the form of acid phosphate, and potash in the form of Kainit or wood-ashes, and will find the soil then to contain fairly well-balanced rations for plant-food, and be rich and productive in a few seasons.

Cow Peas

Valuable for producing milk, growing young stock and fattening all kinds of domestic fowls and animals. Effective fertilizer. Ruling prices to-day. Write, as prices may have changed.

	By Express or Freight at Purchaser's Expense	
	Pk.	Bus.
Black. Quick to mature, well adapted for late planting.....	\$0.85	\$3.25
Clay. Tall; large green leaves; large yellow pod.....	.85	3.00
Large Black Eye. Extremely early; matures in 6 to 8 weeks.....	.85	3.25
New Era. Very regular variety. Matures in 60 to 75 days.....	.85	3.00
Whip-poor-will. Matures early. One of the best for late planting.....	.85	3.25

Soja Beans

Soja Beans take the place of Clover where the soil is not fertile, both for hay and for fertilizing purposes. Sure cropper. One of the richest of natural stock foods. Sow about one bushel per acre.

	Pk.	Bus.
Mammoth Yellow	\$0.75	\$2.75

Dwarf Essex Rape

Extensively grown for sheep forage, and for green manure. Farmers who desire to get young cattle, sheep or lambs into favorable condition to be sold advantageously in the Fall, can do it most cheaply by growing this. Three pounds of seed per acre. Per lb. .15 cts., postpaid. By freight or express: Per lb. 10 cts., bushel of 60 lbs., \$5.00; 100 lbs. and over at 8 cts. per lb.

Sorghum, or Sugar Cane

Sorghum is a sweet fodder of most luxuriant growth. There is no better feed for horses. Fed to cows proves a great milk producer, and is a wonderful feed to fatten hogs. Gem Sorghum will produce as high as twenty tons per acre, and two or three cuttings in a single season.

	By Mail, Postpaid		By Express or Freight, Not Prepaid	
	Lb.	3 lbs.	Pk.	Bus.
Early Amber. Grows 11 to 12 feet; seed excellent food for stock and poultry.....	\$0.20	\$0.55	\$0.85	\$3.00
EARLY GEM. Highly recommended for horses and cows.....	.25	.65	1.00	3.00
Early Orange. Largely planted in the Southern States.....	.20	.55	.85	3.00

Field Peas

Peas are second only to Clover in their soil-enriching properties, and can be grown under almost any condition. The vines make rich, nutritious hay.

most any condition. The vines make rich, nutritious hay.			
Canada Field Peas. A small-seeded very hardy Pea, valuable to sow early in Spring, in connection with stiff-strawed oats, to produce green foliage for making ensilage, or to turn under.....	Pk.	Bus. (60 lb.)	10 bu. per bu.
	\$0.50	\$1.75	\$1.65
Large Marrowfat. Growth immense. Excellent for hay.....	1.25	4.50	4.25

Spring Vetch

Used for the same purpose as Sand Vetch, but will not thrive on poor soil or withstand extremes of weather as successfully. Sow with oats, using a bushel of each an acre. Per lb., postpaid, 20 cts. By freight or express: Lb. 10 cts., 10 lbs. at 7 cts. per lb., bushel \$3.00, 100 lbs. \$6.00.

Sand, Hairy, or Winter Vetch

A large-yielding and nutritious Winter forage crop; splendid for grazing and soil-improving. An annual, but resows itself and will come up year after year on the same ground. Thrives on poor, light land. May be sown in Spring or Fall with about half a bushel of Rye or Oats for support. Per lb., postpaid, 25 cts. By express or freight at 20 cts. per lb., 100 lbs. \$16.00.

Millets

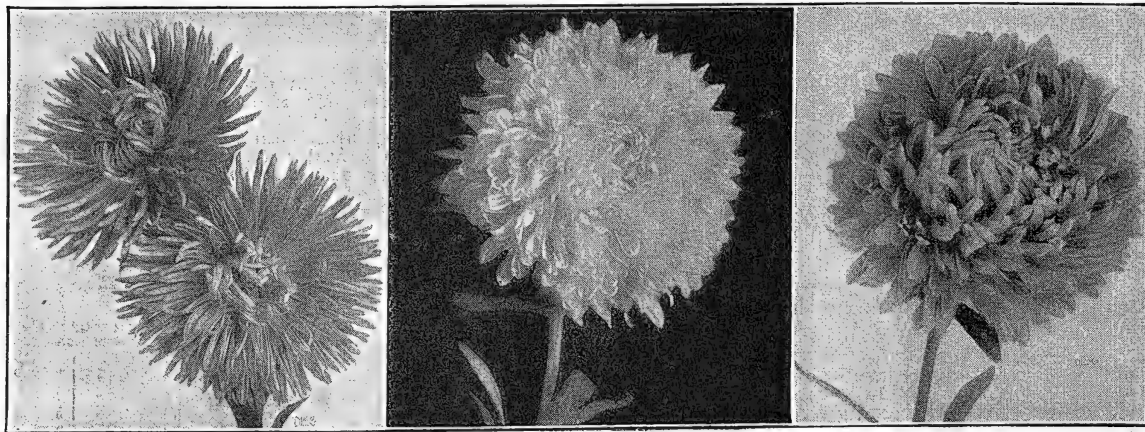

Prices Subject to Change.

	By Mail, Postpaid		By Express or Freight, Not Prepaid	
	Lb.	3 lbs.	Pk.	Bus.
Common Millet. Best quality	\$0.15	\$0.40	\$0.40	\$1.50
German, or Golden Millet. Our seed is Southern-grown; will produce more than double the fodder usually got on the same ground. 4 to 5 feet. Sow one bushel to the acre15	.40	.50	1.75
Japanese Millet. Valuable as a quick-growing forage and ensilage crop. 6 to 8 feet. Use 10 to 12 pounds per acre.....	.15	.40	.75	2.50
Pearl Millet, or Pencilaria. Immense yielder; 8 to 10 feet; can be cut several times during a season. Sow 10 pounds to the acre.....	.30	.75	1.50	5.25
Siberian Millet. Very productive; 4 to 5 feet. Withstands drought wonderfully15	.40	.65	2.25

Hungarian Grass

Valuable forage plant of the Millet family, but not so coarse. Sown and cultivated same as Millet

	.15	.40	.50	1.75

HOLMES' FLOWERS

Flowers are so inexpensive, and so easy to have, that they are not generally appreciated in proportion to what they do to make a place comfortable and beautiful. Even one or two sorts near a house, the small ones in beds and the larger plants standing alone, will do wonders toward lighting the place up and making it more homelike and habitable. And a larger collection properly grouped and arranged over a lawn or garden will make of almost any place a beautiful home.

We have a complete Landscape Gardening Department which is equal to any you would pay much for in laying out your grounds and telling you what plants to use and their cost. No matter how small or how big your idea of planting is, submit it for our plan.

Choice Flower Seeds

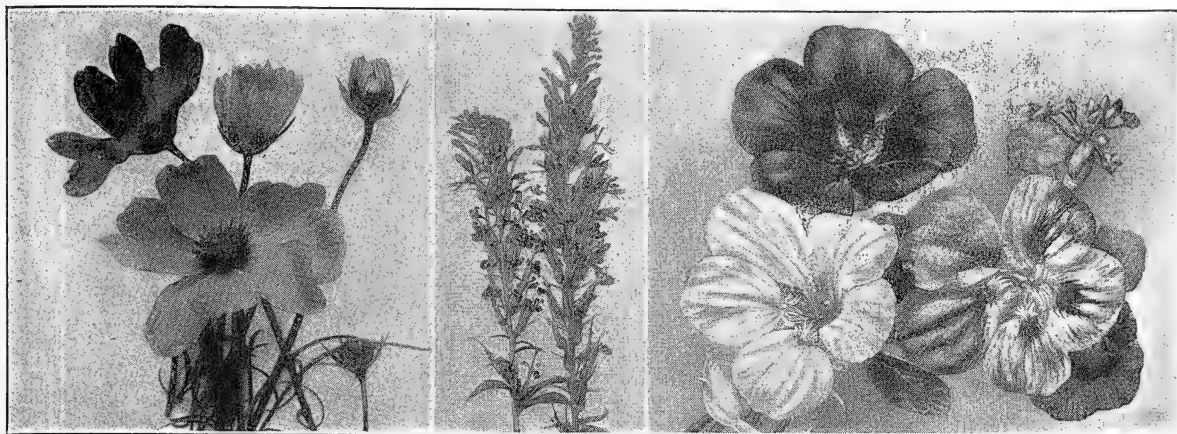

We are specialists in Flower Seeds, and extensive growers. All our seeds are **new crop, tested, and of strong germination.**

General Cultural Directions. The well-known annual flowers, such as Sweet Alyssum, Calliopis, Calendula, Marigold, Mignonette, Nasturtiums, etc., sow where they are intended to flower, either in lines or beds, covering not over four times their size, and firming the soil over them. For those which should be started indoors, such as Heliotrope, Celosia, Lobelia, Salvia, Vinca, Verbena, etc., the best plan is to sow in boxes, covering about one-eighth of an inch and pressing firmly; cover with a pane of glass and keep in a temperature between 60 and 70 degrees. Water carefully as needed. Transplant into boxes, an inch apart each way, or put into small pots until time to plant out. They should have an abundance of air.

Holmes' Mammoth Flowering Asters

Asters are so handsome and useful in a thousand ways that nearly everyone is familiar with them. If there are any points of their treatment and culture that you do not understand, write us. We put out a special book devoted to these and other flowers.

		By Mail, Postpaid	
		Pkt.	¼ oz.
GIANT COMET. Resembles Japanese Chrysanthemum. Flowers often 6 inches across; long, wavy, twisted petals, in loose half-globe. Each plant bears 20 to 30 magnificent flowers on long stems. (75) mixed colors, (76) Rose, (77) White		\$0.10	\$0.60
85	HOLMES' LAVENDER GEM. Flower opens a delicate lavender which deepens with age, full, double and feathery like an ostrich plume.	.10	.75

3084 Early Flowering, or Christmas Mixed05	.10	.25	.75

GENERAL LIST OF FLOWERS GROWN FROM SEEDS

Flower Seeds Delivered Free By Mail

Explanation of signs employed in this list

The asterisk (*) designates *ornamental-leaved* plants. This mark (†) prefixed indicates the *climbers*.

The fourth column gives the DURATION OF CHARACTER, and HARDINESS.

A represents Annual—lasting but one year.

B “ Biennial—lasting two years.

P “ Perennial—lasting three or more years.

E “ Evergreen—retains foliage the entire year.

S represents Shrubs—plants of bushy habit

g “ greenhouse plants.

Bu “ Bulbous plants.

. . . designates, in every case, repetition.

As a large number of Biennials and Perennials, if sown early, flower the first season from seed, this distinguishing mark (†) is affixed to such.

The hardiness is denoted by the following abbreviations, but it should be understood that this is intended to apply to the climate of the Middle Atlantic States. Further north or south, these designations apply only in a comparative way.

h represents hardy—plants for open border. **hh** represents half-hardy—plants that require to be forwarded in pots or frames. **t** represents tender—requiring protection.

NUMBER AND NAME	Hardiness and Duration	Color of the Flower	Height in Feet	Price per Packet	Price per Ounce	BRIEF DESCRIPTION
1 Abronia umbellata (Sand Verbena)	hA	rose	trail.	\$0.05	\$0.50	{ Bears clusters of fragrant flowers. Desirable for baskets, borders or rockeries.

Dahlia Jack Rose

Canna Florence Vaughan

Summer-Flowering Bulbs

PLANT IN APRIL AND MAY FOR FLOWERS IN JUNE, JULY, AUGUST AND SEPTEMBER

Some of the most beautiful flowers we have grown from bulbs. These are so easily cared for and handled that you never need hesitate about planting them. The Gladioli particularly are now taking a place which in amount grown is second to none but Roses and Peonies in America.

Begonias, Tuberous-Rooted

Start bulbs in March and have flowers in June. Plant bulbs outdoors, not before May 1st.

Named Colors	Each	Doz.
Single, Mixed	\$0.07	\$0.75
Named Colors	.10	1.00
Double, Mixed	.12	1.25
	.15	1.50

Large-Flowering Cannas

The very best varieties, largest flowers and richest shadings. The following grow 3 to 4 feet high:

	Each	Doz.	Each	Doz.
Queen Charlotte. Crimson, bordered gold; foliage green.	\$0.10	\$1.00	\$0.15	\$1.50
Allemanina. Salmon, bordered yellow, Orchid; foliage green.	.10	1.00	.15	1.50
Buttercup. The nearest approach to a clear yellow; foliage green.	.10	1.00	.15	1.50
Chas. Henderson. Fine crimson; foliage green.	.10	1.00	.15	1.50
Egandale. Bright cherry-red, foliage bronzed.	.10	1.00	.15	1.50
Florence Vaughan. Rich golden yellow, spotted red; green foliage.	.10	1.00	.15	1.50
Mme. Crozy. Popular bright scarlet, golden edge; foliage green.	.10	1.00	.15	1.50
The following grow 5 to 6 feet high:				
King Humbert. Rich orange-scarlet; foliage bronze.	.10	1.00	.15	1.50
Alphonse Bouvier. Finest tall brilliant crimson; foliage green.	.10	1.00	.15	1.50
Austria. Pure deep golden, immense Orchid flower; foliage green.	.10	1.00	.15	1.50
Italia. Golden blotched crimson, Orchid; foliage green.	.10	1.00	.15	1.50
Pennsylvania. Flowers 6½ inches; intense vermilion-scarlet, overlaid with an orange sheen; foliage green.	.10	1.00	.15	1.50

Special Offer—One each of the above, for 75c.

Cinnamon Vine

A beautiful hardy climber for covering trellis, piazzas, screens, etc.; 15 to 30 feet high. Leaves green, thick and glossy. The white flowers, borne in clusters, emit a delightful, cinnamon-like perfume.

Plants shipped via Express or Freight only.

Hedge Plants

A hedge about a place marks that place at once as the home of a careful and prosperous owner, and best of all it need not cost much.

California or Japan Privet (Ligustrum ovalifolium)

STRONG PLANTS

Nearly evergreen; free of growth, and succeeds under the most adverse conditions, such as under dense shade of trees where other plants would not exist. The best manner of planting is in double rows, the two rows being about 8 inches apart. The smallest size plants here offered should be set 10 to 12 inches apart in the row—alternating the plants—while the larger size may be set 12 to 15 inches apart. In order to secure a dense hedge from the base up, the plants should be severely pruned the first two seasons.

One-year-old, 18 to 24 inches high.....	Doz. \$0.60	100 \$4.50	1000 \$40.00
Two-year-old, 24 to 36 inches high.....	.75	5.50	50.00
Three-year-old, extra heavy specimens.....	1.50	8.50	80.00
Standard, or Tree Privet. Four feet high, 12 inches diameter.....	Each \$1.00	10.00	

Arborvitae (Thuya)

American Arborvitae (Thuya occidentalis). A well-known shrub or tree, popular for ornamental hedges, rapid growth, conical form. 2 to 3 feet, 50c.; 3 to 4 feet, \$1.00; 5 to 6 feet, \$2.00.
Globe Arborvitae (Thuya globosa). Very dwarf and compact; grows naturally into a rounded, almost ball-like form. Foliage is deep, dark green. 10 to 12 inches, 50c.; 12 to 18 inches, 75c.

We also furnish all other varieties of Hedge Plants.

FRUIT TREES

Apples

	6 ft. to 8 ft.	
	Each	Doz.
Arkansas Black. Tree very hardy, coming into fruiting young; fruit large, round and smooth; skin black, flesh yellow, juicy, crisp and delicious flavor.....	\$0.60	\$6.00
Baldwin. Large, roundish; deep bright red; juicy, crisp, sub-acid, good flavor; very productive of fair, handsome fruit.....	.60	6.00
Ben Davis. Large, handsome, striped, productive; a late keeper. Tree remarkably healthy and vigorous.....	.60	6.00
Grimes' Golden (Grimes' Golden Pippin). Of the highest quality; medium to large size; deep golden-yellow, sub-acid, aromatic, spicy and rich.....	.60	6.00
Jonathan. Medium size; red and yellow; flesh tender, juicy and rich; a moderate grower; shoots light colored, slender and spreading; very productive.....	.60	6.00
Mammoth Black Twig. A very large, dark red Winter Apple. Tree vigorous, hardy and productive. November to April.....	.60	6.00
Northern Spy. Large, roundish, slightly conical, somewhat ribbed. Flesh white and tender, with a mild sub-acid, rich and delicious flavor.....	.60	6.00
Paragon. Fruit large, roundish, somewhat flattened; color dark red, slightly streaked; flesh firm, yellow, crisp, aromatic, sub-acid and juicy. It is a very late keeper, rich and of excellent quality.....	.60	6.00
Rome Beauty. Large and handsome, yellow, with crimson cheek, and tender, juicy, yellow flesh. Bears heavy annual crops. One of the best market Apples.....	.60	6.00
Red Astrachan. Large, roundish, nearly covered with deep crimson, overspread with a thick bloom; juicy, rich, acid, beautiful, productive.....	.60	6.00
Smith Cider. Medium size; greenish-white, striped with red; very productive.....	.60	6.00
Stayman's Winesap. One of the finest Apples grown for appearance, flavor and juiciness. A favorite for cider. Medium size, conical; mostly covered with red on yellow ground; flesh fine, crisp and high-flavored.....	.60	6.00
Wealthy. As a late Fall Apple the Wealthy has few equals. Skin smooth, oily, mostly covered with dark red; flesh white, fine grained, juicy, vinous, sub-acid; unequalled for cooking and excellent to eat out of hand.....	.60	6.00
Yellow Transparent. One of the most desirable early Apples in cultivation. Early bearer, frequently producing fine fruit on 2-year trees in nursery rows. Good grower and hardy; fruit pale yellow, roundish ovate, good size and good quality; skin clear white at first, becoming a beautiful pale yellow when fully matured..	.60	6.00

Cherries

	Extra heavy	
	5 ft. to 7 ft.	
	Each	Doz.
Black Eagle. Large; black; tender, rich, juicy and high flavored. Tree a moderate grower and productive.....	\$0.75	\$7.50
Black Tartarian. Very large, purplish-black; half-tender; flavor mild and pleasant. One of the most popular varieties.....	.75	7.50
Early Richmond. Medium size, dark red; melting, juicy, sprightly acid flavor. This is one of the most valuable and popular of the acid Cherries.....	.75	7.50
Governor Wood. Fruit large, roundish, heart-shaped. Skin light yellow, shaded and marbled with bright red. Flesh tender, juicy, sweet, rich and delicious.....	.75	7.50
Large Montmorency. A popular market variety; good for all purposes. Vigorous; very productive. Fruit large, light red; ten days later than Early Richmond...	.75	7.50
Napoleon. A magnificent Cherry of the largest size; pale yellow, with a bright red cheek; flesh very firm, juicy and sweet. Tree a vigorous, erect grower and bears enormous crops.....	.75	7.50
Windsor. A remarkably firm, large late variety. Fruit large, liver-colored, of good quality; valuable for market and family use.....	.75	7.50
Yellow Spanish. Large; pale yellow, with bright red cheek in the sun; flesh firm, juicy and delicious; one of the best, most beautiful and popular of all light-colored Cherries.....	.75	7.50

Peaches

	Extra strong	
	5 ft. to 6 ft.	
	Each	Doz.
Beer's Smock. Large size; flesh yellow. September and October.....	\$0.40	\$4.00
Carman. Fruit large, with pale yellow skin, red blush on sunny side; flesh white, tender and melting, rich sweet and of superior flavor.....	.40	4.00
Crawford's Early. The best yellow Peach for market; fruit large, oblong; skin yellow, with fine red cheek; flesh yellow, juicy; wonderfully productive.....	.40	4.00
Belle of Georgia. Freestone; skin rich creamy-white, with a bright red cheek on sunny side; quality delicious. Season same as Oldmixon, or a few days before Elberta.....	.40	4.00
Champion. One of the hardest and most reliable varieties. Freestone; very large; creamy-white, bright red cheek; flesh creamy-white, firm, sweet, delicious.....	.40	4.00
Chair's Choice. A most excellent late market Peach. Freestone; very large; yellow, with a red cheek; flesh yellow, firm and of good quality. Tree of strong growth and bears well; fruits early.....	.40	4.00
Crawford's Late. Fruit of the largest size; skin greenish-yellow, with dull red cheek; flesh yellow; one of the finest late sorts.....	.40	4.00
Elberta. Large, yellow, with red cheek; flesh yellow; firm, juicy, of high quality. Exceedingly prolific, sure bearer and hardy.....	.40	4.00
Ford's Late White. Large, white, handsome; of good quality.....	.40	4.00
Frances. It is one of the handsomest Peaches ever grown, being of a beautiful shade of yellow, covered almost entirely with brilliant red. In size it is about the equal of Elberta. Very productive; a true freestone, with particularly solid flesh.....	.40	4.00
Greensboro. Freestone; large, round; yellow, with a bright red covering; flesh white, very juicy, and of excellent flavor.....	.40	4.00
Mountain Rose. The largest early Peach. White, with red cheek; rich and very good; productive and reliable.....	.40	4.00
Oldmixon Free. Uniformly large; white, covered with bright red; one of the best... Sneed. Very early; fully as large as Alexander; red cheek; flesh white, very sweet and juicy; good flavor.....	.40	4.00
Stephen's Rare Ripe. Trees productive and free from disease. Fruit white, shaded red. Flesh firm, juicy, superior quality. Freestone.....	.40	4.00
Stump the World. Very large; skin white; bright red cheek; flesh white, juicy, good	.40	4.00

Pears

Anjou. A large and handsome Pear, buttery and melting; one of the most valuable..	
Bartlett. Large size, with often a beautiful blush next the sun; buttery, very juicy and high flavored; bears early and abundantly.....	
Flemish Beauty. Large, beautiful, juicy, melting, rich and fine; good bearer; one of the hardest and does well nearly everywhere.....	
Howell. Large, light waxen yellow, with a fine, red cheek; handsome, rich, sweet, melting; perfumed, aromatic flavor.....	
Kieffer. While not of best quality, properly ripened it is a fair dessert fruit, and one of the very best for canning and preserving.....	
Lawrence. A good grower, with good foliage; very productive and an annual bearer. Fruit medium, canary-yellow, sweet and excellent; a good keeper.....	
Rossney. A large variety of rare merit; flesh fine grained, melting, juicy and of superior flavor; skin a beautiful creamy yellow, with crimson blush.....	
Seckel. Small, skin rich yellowish-brown, when fully ripe, with deep, brownish-red cheek; flesh very fine grained, sweet, exceedingly juicy, melting, buttery.....	
Worden-Seckel. A seedling of the Seckel. Equal in quality to its famous parent, which it much resembles in flavor, is equally as luscious, more juicy, and with an aroma equally as rich and inviting, while in size, color, form and appearance it is decidedly superior.....

Spray Pumps, Nozzles and all Fixtures

SEND FOR SPECIAL PUMP CATALOGUES.—We have made arrangements with all the leading and reliable pump manufacturers to distribute their full line of pumps from our warehouses. If you want any make or style of pump, send to us for catalogue and special wholesale factory price. We can save you money. We have a complete line of supplies and can supply your needs promptly.

Myers' Perfect Lever Bucket Pump.

It has all the advantages of the ordinary barrel pump and bucket pump combined. An ideal whitewash pump also. Price \$4.25.

Improved Brass Barrel Spray Pump.

Very powerful and easily operated nozzle. 5 feet hose. Price \$8.00.

Gould's Pomona Barrel Pump.

Complete with nozzle. Price \$18.75.

Dry Powder Sprayer.

Price, 60 cents.

New Daisy Sprayer.

Gives continuous spray with both front and back action of plunger. Price, 75 cts. each.

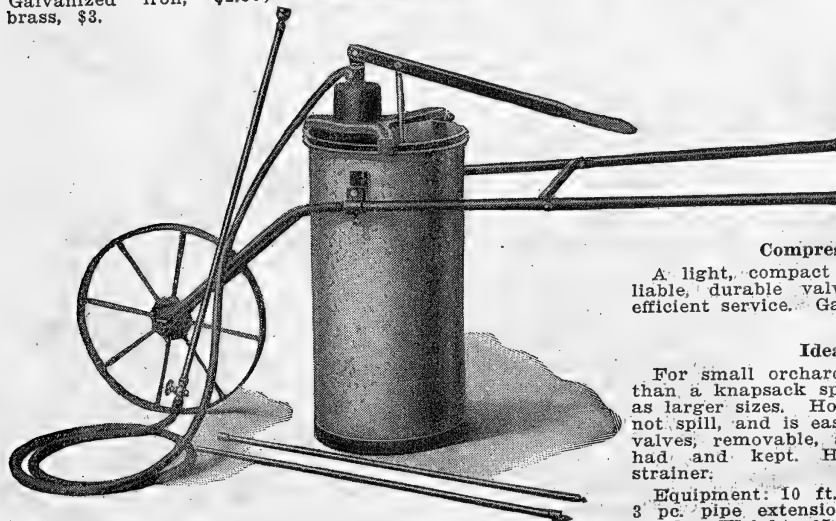

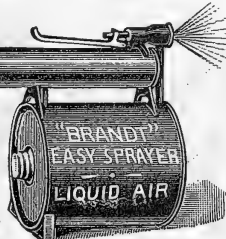

Myers' O. K. Spray Pump.

Has mechanical agitator, solid brass ram plunger, ground bevel valve and seat. Adjustable clamps, will fit any barrel. Use with any kind of mixture. Air-chamber for a pressure of 200 lbs. or more. A thoroughly good pump in every respect. Price \$18, with 5 feet of hose and vermored nozzle.

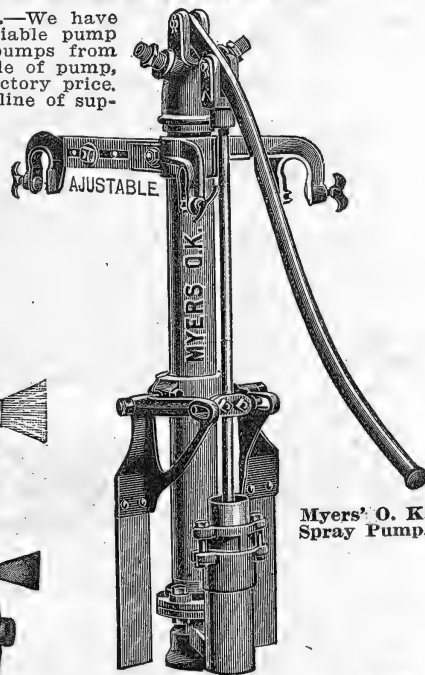

Myers' Perfect Lever Bucket Pump.

The "Easy" Compressed Air Sprayer.

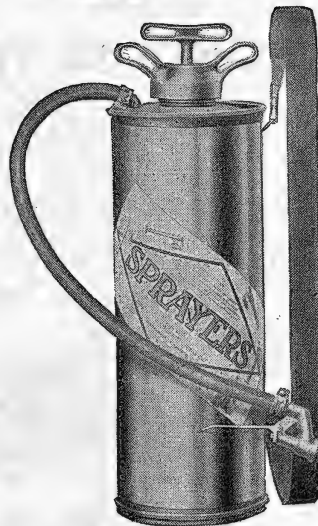

Of galvanized steel or of brass. Has automatic shut-off nozzle. Holds 1 gallon and is fine for small gardens or lawns. Galvanized iron, \$2.50; brass, \$3.

Ideal Spraying Outfit.

Myers' O. K. Spray Pump.

Compressed Air Spray Pump.

Compressed Air Spray Pump.

A light, compact compressed air sprayer with reliable, durable valves and complete equipment for efficient service. Galvanized iron, \$4.00; brass, \$6.00.

Ideal Spraying Outfit.

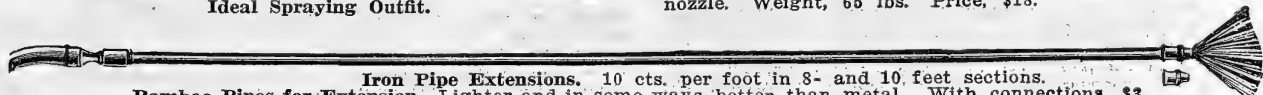

For small orchard, garden and farm. It is better than a knapsack sprayer and does not cost so much as larger sizes. Holds 15 gallons, is mounted so will not spill, and is easy to handle and operate. Bronze valves, removable, air pressure of 100 lbs., is easily had and kept. Has mechanical agitator and a strainer.

Equipment: 10 ft. 3-8 inch pressure hose, 10 foot 3 pc. pipe extension, 1 T shut-off cock, 1 Brandt nozzle. Weight, 65 lbs. Price, \$18.

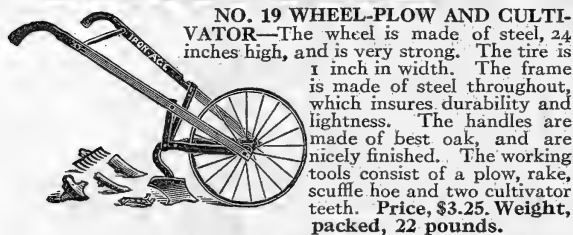

Iron Pipe Extensions. 10 cts. per foot in 8- and 10 foot sections.

Bamboo Pipes for Extension. Lighter and in some ways better than metal. With connections, \$3.

Send or Call for Book on Spraying.

IRON AGE FARM AND GARDEN TOOLS

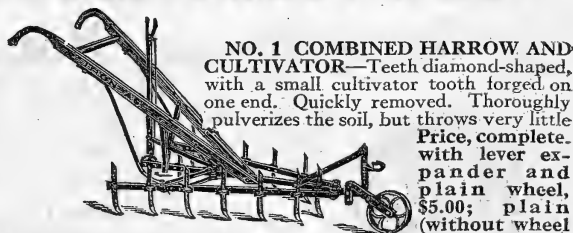

NO. 19 WHEEL-PLOW AND CULTIVATOR—The wheel is made of steel, 24 inches high, and is very strong. The tire is 1 inch in width. The frame is made of steel throughout, which insures durability and lightness. The handles are made of best oak, and are nicely finished. The working tools consist of a plow, rake, scuffle hoe and two cultivator teeth. Price, \$3.25. Weight, packed, 22 pounds.

NO. 6 COMBINED DOUBLE AND SINGLE WHEEL-HOE, HILL AND DRILL SEEDER—Sows all kinds of seeds from celery to beans, with the greatest regularity in hills, 4, 6, 8, 12 and 24 inches apart, or in drills. Quickly changed to double or single wheel-hoe (run astride the row and cultivate both sides at the same time), cultivator, plow or rake. Complete, \$12; as Seeder only, Iron Age No. 7, \$9; Hoe complete, \$7; No. 3 Iron Age (side hoes only), \$4.25.

NO. 20 SINGLE WHEEL-HOE—Perfect single wheel tool. Plows, rakes, cultivates and hoes. Hill and drill seeder attachments may be added. Price, No. 20 complete, \$6; No. 21 (side hoes only), \$4.

NO. 18 DRILL SEEDER—Iron Age Drill Seeder, will sow all kinds of seeds in drills or continuous rows and is a low priced tool. Plow, cultivator teeth, rakes and hoes, etc., may be added. Price, \$7.50.

NO. 1 COMBINED HARROW AND CULTIVATOR—Teeth diamond-shaped, with a small cultivator tooth forged on one end. Quickly removed. Thoroughly pulverizes the soil, but throws very little. Price, complete, with lever expander and plain wheel, \$5.00; plain (without wheel

and lever expander), \$3.75.

NO. 6 COMBINED HORSE-HOE AND CULTIVATOR—Lever adjustable; expands from 14 to 30 inches. Wheel regulates depth. Side hoes have numerous adjustments. A most satisfactory and popular implement. Price, complete as in cut, \$6.25; with plain wheel and without lever expander, \$5.00.

CELERY HILLERS

—Leaf lifters adjustable in height, and are especially valuable for first workings. Hill celery without handling. Equipped with lever expanders, leaf lifters, and lever wheel. Hilling blades 43 inches long, and adjustable in width and height; works rows up to 4 feet apart. \$16. Double, packed, weight 88 pounds.

NO. 1 IRON AGE HORSE-HOE AND CULTIVATOR—Plain, simplest form, \$3.15. Wheel, lever expander, horse-hoes and sweeps, furnished with this tool, as shown on No. 6.

NO. 25 IRON AGE SINGLE-WHEEL FERTILIZER DISTRIBUTOR—Fertilizer may be sown across the bottom of furrow or on either side, or the tool may be used for side-dressing growing crops. Light, and strongly built. Price, \$8. The Iron Age Fertilizer Attachment, with all necessary parts (price, \$4.50, separately), may be applied to most Iron Age tools. Seeder attachment may be applied.

PLANET JR. TOOLS—Get Largest Crops with Least Work

NO. 3 PLANET JR. SEEDER has special force-feed for reliable hill dropping at 4, 6, 8, 12 or 24 inches, or accurate drill sowing, as desired. The opening and covering arrangements are unequaled. We can supply a special opening plow for sowing onion seed for sets. Price, \$10.50. Fifteen-inch steel driving wheel. Holds 3 quarts of seed.

NO. 4 PLANET JR. COMBINED HILL AND DRILL SEEDER, WHEEL-HOE, CULTIVATOR AND PLOW, saves time, labor, seed and money. Almost all useful garden implements in one. Adjustable in a minute to sow all garden seeds, hoe, cultivate, weed, or plow. Pays quickly, even in small gardens. Price, complete, \$11; as a Seeder only, \$9. Holds 2½ quarts of seed.

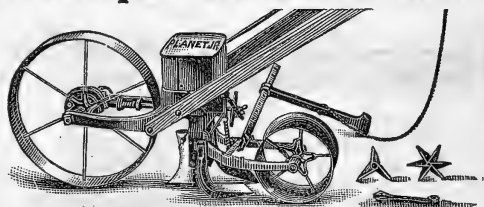

No. 4 Planet Jr. Combined Hill and Drill Seeder

NO. 12 PLANET JR. DOUBLE WHEEL-HOE, CULTIVATOR AND PLOW is the handiest implement ever made for truckers and gardeners. All cultivating parts are of high-carbon steel to keep keen edge. Specially designed to work extremely close to plants without injury. Does away with hand-weeding. Come and see them. Price, \$7.

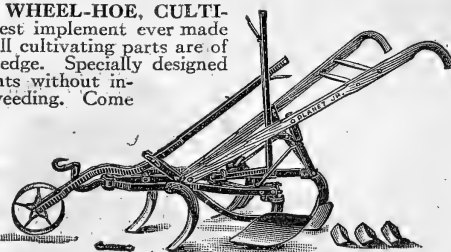

NO. 16 PLANET JR. SINGLE WHEEL-HOE is a most handy and effective tool for garden cultivation. A fine tool for working close to crops. Price, \$5.85.

NO. 17 SINGLE WHEEL-HOE, the same as No. 16, but without the rakes. Price, \$5. The most popular wheel-hoe on the market. It is light, strong, and with it you can do the work of from four to six men with hand hoes, and do it easier and better. A favorite among market-gardeners.

NO. 8 HORSE-HOE AND CULTIVATOR will do more things in more ways than any other horse-hoe made. Plows to or from the row. A splendid furrower, coverer, hiller, and horse-hoe. Unequaled as a cultivator. Price, \$9; weight packed, 82 pounds.

No. 3 Planet Jr. Hill and Drill Seeder

No. 8 Planet Jr. Horse-Hoe and Cultivator

Planet Jr. No. 12 Double Wheel-Hoe

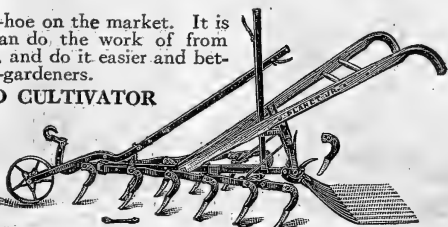

No. 16 Planet Jr. Single Wheel-Hoe

PLANET JR. 12-TOOTH HARROW, CULTIVATOR AND PULVERIZER is a wonderful tool for berry-growers and market-gardeners. Works deep or shallow without throwing earth on the plants, and pulverizes the soil thoroughly. Invaluable wherever fine, close work is needed. Complete, \$9;

weight, packed 74 pounds; without pulverizer, \$7.40; plain, \$6.20.

The 1912 Illustrated Planet Jr. Catalogue is of great value to every tiller of the soil, whether he needs implements or not. It is free. Write to-day.

Planet Jr. 12-Tooth Harrow

How to Build up Your Farm

WITHOUT EXPENSIVE FERTILIZERS

90% of the actual farm lands throughout the country are yielding not over 25% of their capacity. This means that 90% of the farmers of the country are getting about 25 cents from their farms where they should get \$1.00. Through experiments carried on by the Department of Agriculture it has been demonstrated that this tremendous loss is due to negligence of soil conditions—and the fact that these conditions can be easily remedied makes this announcement all the more startling. The remedy is within the reach of every farmer in the land, and consists principally in planting such legume crops as

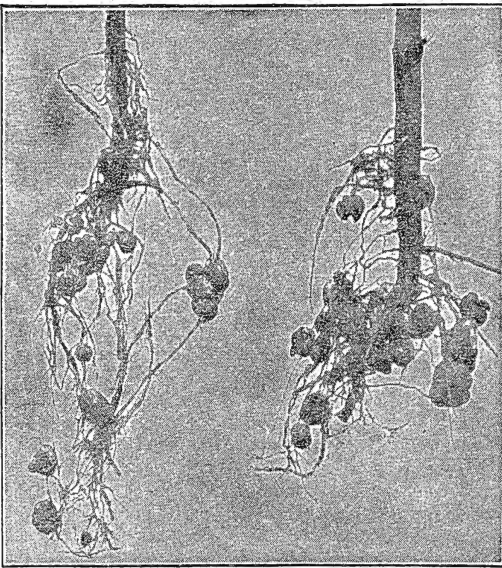

Alfalfa, Cow-Peas, Soy Beans, Clovers, Vetch, Peanuts, Peas, Beans

These legumes should be inoculated and planted in land which is not sour or acid. The majority of the farm lands of the country are in a sour condition, but this is very easily corrected by an application of lime. After you have supplied the lime, then plant the legume seeds which you have inoculated

and you will grow a tremendous amount of foliage. This can be cut and cured as hay — or better still, turned under, which will add great quantities of humus. The roots of the inoculated legumes will add vast quantities of nitrates to the soil. To realize that you can more than double your crops of corn or wheat or cotton by simply planting legume seeds which have been inoculated, shows you that in this way

It is Possible to Increase Your Farm Value More Than 100%

If you could get \$2 a bushel for your corn, or 30 cents a pound for your cotton, or \$3 a bushel for your wheat, you would consider it was time to sell every bit that you had on hand; yet you can get this same amount of money by increased crops, with practically no additional work, and at the same time increase the permanent value of your farm by commencing this year to make your soil yield greater returns.

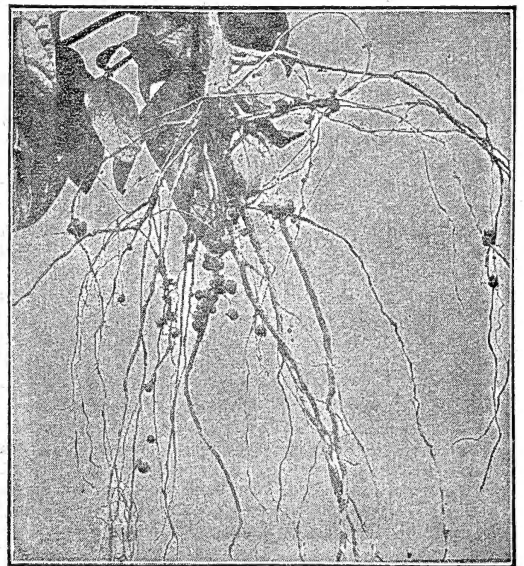

NITRATE SACKS ON THE ROOTS OF SOY BEANS. THESE SACKS OR NODULES CONTAIN NITRATES WHICH ENRICH THE SOIL FOR OTHER CROPS.

We cannot urge too strongly the liming of your land and planting inoculated legume seed. It means a bountiful return for the same labor which you are now giving to secure a mere living. The future of agriculture in this country depends on good seed, good inoculation and good soil conditions. We sell high-grade seed as we always have, and we now offer the highly recommended inoculation called Farmogerm. This inoculation comes prepared in bottles ready for use. You can inoculate your seed in a few minutes, and its cost is but \$2 per acre, or \$9 for five acres. It is endorsed by the leading farmers and agricultural experiment stations throughout the country.

We strongly recommend our customers to inoculate all their Legume Seeds with Farmogerm

HOLMES SEED COMPANY
Seed Growers and Merchants
9 North Market Sq., Harrisburg, Pa.

NITRATE SACKS ON COW PEA ROOTS. 1200 LBS. OF NITRATES TO THE ACRE EQUAL TO \$30 WORTH OF NITRATE OF SODA OR 8 TONS OF MANURE, MAY BE DEPOSITED IN THE SOIL IN THIS MANNER.

The Use of Legumes to Enrich the Soil and the Use of Farmogerm to Inoculate the Legume Seeds is Endorsed by the Leading Farmers and Agricultural Experiment Stations Throughout the World

Prominent Farmers

Scottsbluff, Nebraska.

Gentlemen:—I am in receipt of your letter of October 8th, inquiring as to the results I obtained this season by the use of Farmogerm for inoculating alfalfa seed. I take much pleasure in advising you that I am an enthusiastic convert to Farmogerm, and that the results secured by its use were all that the most exacting could ask for. This stand was the best that I have ever seen and after harvesting sixty bushel of oats per acre that weighed 40 pounds to the bushel, which I planted as a cover crop with the alfalfa, I irrigated the land and have just cut a crop of alfalfa of good quality and fair yield. The full benefit from the use of Farmogerm will make itself even more apparent, I am confident, in the yield of hay next season.

I would suggest, except under irrigation, where water can be applied to the land just as needed, no grain be planted with the alfalfa as a cover crop, and that in all instances, the land be carefully prepared and the seed be planted very shallow. Many fail to secure a good stand of alfalfa by putting in seed too deep. With kind regards, and best wishes for your continued success, believe me,

Very truly yours, (Signed) Heyward G. Leavitt.

P. S.—I planted 400 acres in all to alfalfa, all of the seed for which was treated with Farmogerm.

Grand Valley, Colo.

Dear Sirs:—Your Company has been recommended to me by H. G. Leavitt, of Scottsbluff, Neb. I am writing to ask you to send me some of your pamphlets or any information that you may have in regard to using your bacteria with alfalfa seed. We will plant about 200 acres of alfalfa in the spring, and I would like very much to use your bacteria in connection with the seed, as I have seen some wonderful results around Scottsbluff, Neb. Hoping to have an early answer,

Yours truly,

(Signed) R. Havemeyer.

Ghent, N. Y.

Gentlemen:—I put in a piece of alfalfa at Orchard Farm the past summer that has made a most remarkable growth. On July 1st, 1,500

pounds of lime was applied per acre and the same amount of basic slag. The seed was inoculated with the alfalfa bacteria you sent and sown on the 20th of July. In forty-seven days the plants reached twenty-seven inches in height and in sixty days, when cut, they measured thirty-two inches. This is equal to any acre of irrigated alfalfa in the country. Shall put in more of it next season.

Yours truly, (Signed) George T. Powell.

Ivanhoe, N. C.

Gentlemen:—In reply to your inquiry of the 8th inst., I will say that I used Farmogerm according to the instructions given, on cowpeas, planting the same between corn on various kinds of land. Old worn out sand-land with yellow subsoil, stiff clay land, and black friable land. The season was very unfavorable; soon after planting there was a long wet spell followed by a drought that has lasted until the present time. The consequence of the season is, many of the pea plants died from want of moisture and the weed is small but quite full of fruit averaging a very fair crop. All these lands are old worn land that will not produce peas of itself, so I feel repaid for my trouble and expense in using Farmogerm, notwithstanding the unfavorable circumstances. The corn also was considerably benefited by Farmogerm. I consider it more beneficial to growing crops than any commercial fertilizer I have tried.

Yours truly, (Signed) E. E. Sessoms.

Liberty, N. Y.

Gentlemen:—Yours of the 8th before me and in reply am glad to say that I received a very fine stand of clover from seed inoculated with Farmogerm. The land is of a clay, not very heavy, was well limed, sowed to buckwheat which was ploughed in green, then last fall the piece was sowed to rye and timothy. This spring the clover inoculated with Farmogerm was sown broad-cast and it is now looking like a well-kept lawn, rich green. The clover looks remarkably healthy and growthy. I will need some more Farmogerm early next spring.

Respectfully (Signed) R. P. Watson.

Agricultural Experiment Stations

Prof. Jacob G. Lipman, of the New Jersey Agricultural Experiment Station, states that he got good results from the use of Farmogerm for Alfalfa, Cowpeas and Garden Peas.

George W. Carver, Director, Tuskegee Institute, Ala. "My plot of crimson clover which was inoculated with Farmogerm is about three times better than the uninoculated; it is exceedingly luxuriant while the other is straggly, pale and not worth cutting."

J. N. Harper, Director, South Carolina Agricultural Experiment Station. "I have your letter of Oct. 21st with the enclosed letters from gentlemen who have tried your Farmogerm and found it to be of great value. We have tested Farmogerm in a small way and from results obtained are very much pleased with it."

Charles B. Morrey, of the Ohio State University. "The organisms were obtained in pure culture from each sample sent. The pot experiments also show that the cultures were virulent in that nodules were formed on the plants tested, while the control pots showed no nodules. The experiments were satisfactory in every respect."

L. B. Judson, N. Y. College of Agriculture. "I take pleasure in stating that I have every confidence in your method of preparing cultures of bacteria for inoculating the various leguminous crops. I believe that the processes you use have all the value you claim for them, and that your method of air bottles in which you send out cultures, is a very valuable device. Your work, to me, seems full of great promise to the farming industry."

F. O. Clark, Berea College, Ky. "Your letter of October 21st inquiring as to the results obtained from the use of Farmogerm, is at hand. In our school garden we planted several plots in sweet peas and Canadian field peas, using Farmogerm on every other plot. I was quite surprised to find the plants grown in the plot where Farmogerm was used, were nearly twice the size of those on the other plot. This test indicates that your bacteria are of the right sort, and well put up. Wishing you success in extending the use of Farmogerm and thus the use of legumes."

P. E. Crabtree, Kansas State Agricultural College, regarding experiments in Mexico: "Regarding the application of Farmogerm which I made the year before, the alfalfa had developed nodules and had come into full bloom nicely, and if cared for would have succeeded and thrived—in other words, the application was a success. The soy beans developed these nodules and thrived splendidly, although it was the first time introduced into that valley. As regards cow peas—if possible their thriftiness was increased although they thrive nicely in that soil anyhow.***"

Louisiana State University. Experiment in North Louisiana, with alfalfa, shows a yield of 6004 lbs. per acre, where Farmogerm and lime was used, and a yield of 720 lbs. per acre where no Farmogerm or lime was used—a gain of 833%.

DON'T YOU THINK IT PAYS TO USE FARMOGERM?

Holmes' High-Grade Fertilizers

PRICES SUBJECT TO
MARKET CHANGES

Ashes, Canadian Hardwood. 100 lbs. \$1.50, bbl. \$2.50, ton \$20.

Bone Flour (Pure). Ground perfectly fine; excellent for pot plants or beds where an immediate effect is wanted. 5 lbs. 25 cts., 10 lbs. 45 cts., 25 lbs. \$1.00, 50 lbs., \$1.50, 100 lbs., \$2.50, bbl. of 200 lbs., \$4.50, ton \$40.

Bone Meal. Strictly pure and fresh. The most substantial fertilizer for lawns and plants is Holmes' Bone Meal. It keeps on feeding the soil for fully ten months. 3-lb. bag 15 cts., 5-lb. bag 25 cts., 10 lbs. 40 cts., 25 lbs. 85 cts., 50 lbs. \$1.25, 100 lbs. \$2.25, 200-lb. sack, \$3.75, ton \$32.

Bone. Pure, coarse ground. Excellent fertilizer for lawns and borders, coarser than bone meal, 25 lbs. 85 cts., 50 lbs. \$1.25, 100 lbs. \$2.25, 200-lb. sack \$3.50, ton \$32.

Cotton Seed Meal. 5 lbs. 25 cts., 10 lbs. 40 cts., 25 lbs. 85 cts., 50 lbs. \$1.50, 100 lbs. \$2.50, 200-lb. sack \$4, ton \$33.

Cow or Cattle Manure (Shredded). One sack of this is equal to one cartload of fresh cow manure; is convenient to handle. In 100-lb. sacks, only \$2.00 per 100 lbs.; 500 lbs. \$9.00, \$16.00 per 1000 lbs., ton \$30.00.

Guano (Pure Peruvian). 1½-lb. box 15 cts., 3½-lb. box 25 cts., 10 lbs. 50 cts., 25 lbs. 90 cts., 100 lbs. \$2.50, 200-lb. sack, \$4.50, ton, \$40.

Guano (Potato, Corn and Truck). Guaranteed analysis. Actual potash, 6 to 8 per cent.; ammonia, 1½ to 2½ per cent.; available phos. acid, 6 to 8 per cent.; in original sacks only. Sack of 200 lbs. \$3.50, ton \$30.

Holmes' Plant Food. Very effective, clean and easily applied. Pkg. 15 cts., 4 pkgs. 50 cts. (by mail, 24 cts. per pkg.).

Muriate of Potash. Lb. 10 cts., 5 lbs. 35 cts., 10 lbs. 50 cts., 25 lbs. \$1.15, 50 lbs. \$1.75, 100 lbs. \$3, 200 lbs. \$5.50.

Nitrate of Soda. Should not be applied until the plants are above the ground, when 100 to 150 lbs. per acre should be sown with other fertilizers, or mixed with phosphates. Lb. 3 cts., 5 lbs. 25 cts., 10 lbs. 50 cts., 25 lbs. \$1.10, 50 lbs. \$2, 100 lbs. \$3.50, 200 lbs. \$6.50, ½ ton \$30, ton \$58.

Phosphate (Baugh's High Grade Ammoniated). 5 lbs. 20 cts., 10 lbs. 35 cts., 25 lbs. 60 cts., 50 lbs. \$1, 100 lbs. \$1.75, 200 lbs. \$3, ton \$25.

Phosphate. Super High Grade. Analysis: Ammonia, 4 to 6 per cent.; bone phosphate, 24 per cent.; available phos. acid, 6 to 8 per cent.; sulph. potash, 1 to 2 per cent. It stands without a rival as the largest crop producer. Apply 400 lbs. per acre. 5 lbs. 20 cts., 10 lbs. 35 cts., 25 lbs. 60 cts., 100 lbs. \$2, 200 lbs. \$3.50, ton \$30.

Plant Blood. Pkg. 15 cts., 12 lbs. \$1, 25 lbs. \$1.75, 50 lbs. \$3, 100 lbs. \$5.50.

Potato Manure (Baugh's). 25 lbs. 75 cts., 50 lbs. \$1.10, 100 lbs. \$2, 200 lbs. \$3.50, ton \$30.

Sulphate of Potash. 5 lbs. 40 cts., 25 lbs. \$1.50, 100 lbs. \$4, 200 lbs. \$7.25.

Sheep Manure (Wizard Brand). Pure, fresh pulverized. One of the richest general fertilizers. 2 lbs. 15 cts., 5 lbs. 25 cts., 10 lbs. 40 cts., 25 lbs. 75 cts., 50 lbs. \$1.25, 100 lbs. \$2, 500 lbs. \$9.00, ½ ton \$16, ton \$30.

Sulphate of Ammonia. Lb. 10 cts., 5 lbs. 35 cts., 10 lbs. 60 cts., 50 lbs. \$2.50, 100 lbs. \$4.50.

Wood Ashes (Canada Unleached Hardwood). 5 lbs. 20 cts., 10 lbs. 35 cts., 25 lbs. 60 cts., 50 lbs. 85 cts., 100 lbs. \$1.50, bbl. \$2.50, ½ ton \$10, ton of 2,000 lbs. \$20. Apply about 1,000 lbs. to the acre.

FARMOGERM. A nitrogen-gathering bacteria for legumes. Trial size 50 cts., acre size \$2. (Send for booklet.)

Insect Destroyers

PRICES SUBJECT TO
MARKET CHANGES

Ant Exterminator. Very effectual for destroying ants in gardens and lawns. ¼-lb. 20 cts., ½-lb. 40 cts., lb. 75 cts.

Aphine. For destroying aphids, greenfly, thrip, red spider and other greenhouse and outdoor insects. It dilutes readily in water, about 1 part to 40 of the latter. Small can 25 cts., 40 cts. per ½ pint; pint, 65 cts., \$1.00 per qt.; per gal. \$2.50.

Arsenate of Lead (Swift's). For spraying trees and shrubbery against attacks of leaf beetles. Lb. 25 cts., 5 lbs. 90 cts., 10 lbs. \$1.70, 50 lbs. \$8, 100 lbs. \$15.

Bordeaux Mixture. For black rot, downy mildew, and anthracnose of grape, potato blight, potato rot, leaf blight of cherry, pear, quince and other fungous diseases. Lb.-box 20 cts., 5 lbs. 75 cts., makes 25 gallons spray, 10 lbs. \$1.25, makes 50 gallons spray, 25-lb. box \$3, makes 125 gallons.

Bug Death. Now largely used instead of Paris Green; more safe, just as effectual, and acts as a fertilizer as well as an insecticide. Lb. 15 cts., 3 lbs. 35 cts., 5 lbs. 50 cts., 12½ lbs. \$1, 100 lbs. \$7.50. (Special Shaker, 25 cts.)

Cow Ease. The finest article for affording comfort to cattle. They will yield more milk and remain in better condition. Qt. 35 cts., gal. \$1, 5 gals. \$4.

Hellebore. For destroying rose slugs. ¼-lb. 10 cts., ½-lb. 15 cts., lb. 25 cts., 5 lbs. \$1, 10 lbs. \$1.85.

Kerosene Emulsion. Paste. For plant lice of any kind. Lb. 20 cts., 5-lb. can makes 50 gallons spray 60 cts., 25-lb. can \$2.50.

Kerosene Emulsion. Liquid. Qt. 40 cts., gal. \$1.

Lemon Oil. Will destroy mealy bug, scale, thrip, red spider, etc. ½-pt. 25 cts., pt. 40 cts., qt. 75 cts., ½-gal. \$1.25, gal. \$2, 5 gals. \$9. Dilute one part to 30 of water.

Lime Sulphur Solution. For San José Scale. Gal. dilutes 12 to 15 gals. of water. Gal. \$1, 5-gal. can \$2.25, 10 gals. \$3.75, half bbl., about 30 gals., 25 cts. per gal.; bbl. about 50 gals., 20 cts. per gal.

Nicotinic Acid. A powerful insecticide for vaporizing. ¼-pt. 70 cts., ½-pt. \$1.25, pt. \$2.50, qt. \$4.50. Lamps, each 50 cts.

Nico Fume. Liquid. For spraying and vaporizing. ¼-pt. 50 cts., pt. \$1.50, ½-gal. \$5.50, gal. \$10.50.

Nico Fume. An improvement on Aphis Punk; elegant reports from florists who have used it. Positive death to red spider and aphids. Put up in air-tight metal packages. Box 75 cts., 144 sheets \$3.50, 288 sheets \$6.50.

Nikoteen. For spraying and vaporizing. Pt. \$1.50, 10 pts. \$14.

Paris Green. (Pure.) ¼-lb. 15 cts., ½-lb. 25 cts., lb. 40 cts., 5 lbs. \$1.90, 14 lbs. \$5.

Rose Leaf Extract of Tobacco. Pt. 30 cts., qt. 50 cts., gal. \$1.25, 5 gals. \$4.25.

Slug Shot. Canister with perforated top, 15 cts., 5 lbs. 25 cts., 10 lbs. 50 cts., 25 lbs. \$1.20, 50 lbs. \$2.25, 100 lbs. \$4.25. Full barrel lots, about 250 lbs. (Lb. 3¼ cts., F. O. B. factory), lb. 4 cts., F. O. B. Harrisburg.

Sulphur. A preventive and cure for mildew. Lb. 7 cts., 5 lbs. 30 cts., 25 lbs. \$1.25, 100 lbs. \$4.

Sulphate of Copper. For spraying. Lb. 12 cts., 10 lbs. \$1.00, 25 lbs. \$2.25, 100 lbs. \$8.

Sulpho Tobacco Soap. 4-oz. pkg. 10 cts., 8-oz. pkg. 20 cts.

Tobacco Dust. Cheaper than snuff and quite as effectual. Lb. 10 cts., 10 lbs. 45 cts., 25 lbs. \$1, 100 lbs. \$3.50.

Tobacco Dust (Stoothoff's). For burning or dusting; state which is wanted. 5 lbs. 35 cts., 10 lbs. 60 cts., 25 lbs. \$1.25, 50 lbs. \$2, 100 lbs. \$3.50.

Tobacco Soap. For destroying insects, parasites and their eggs infesting either plants or animals. ½-lb. 20 cts., lb. 40 cts.

Tobacco Stems, Fresh. 200 lbs. \$2.00, ½-ton, \$6.50, ton \$12.

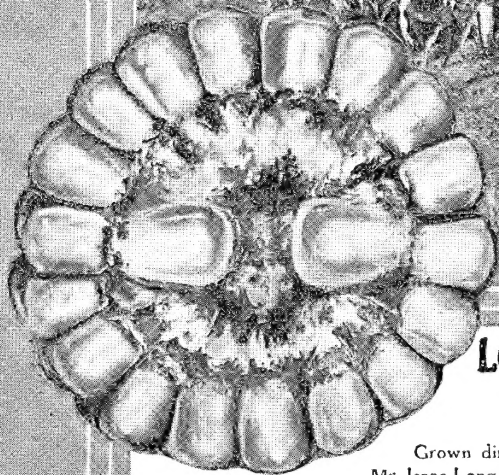

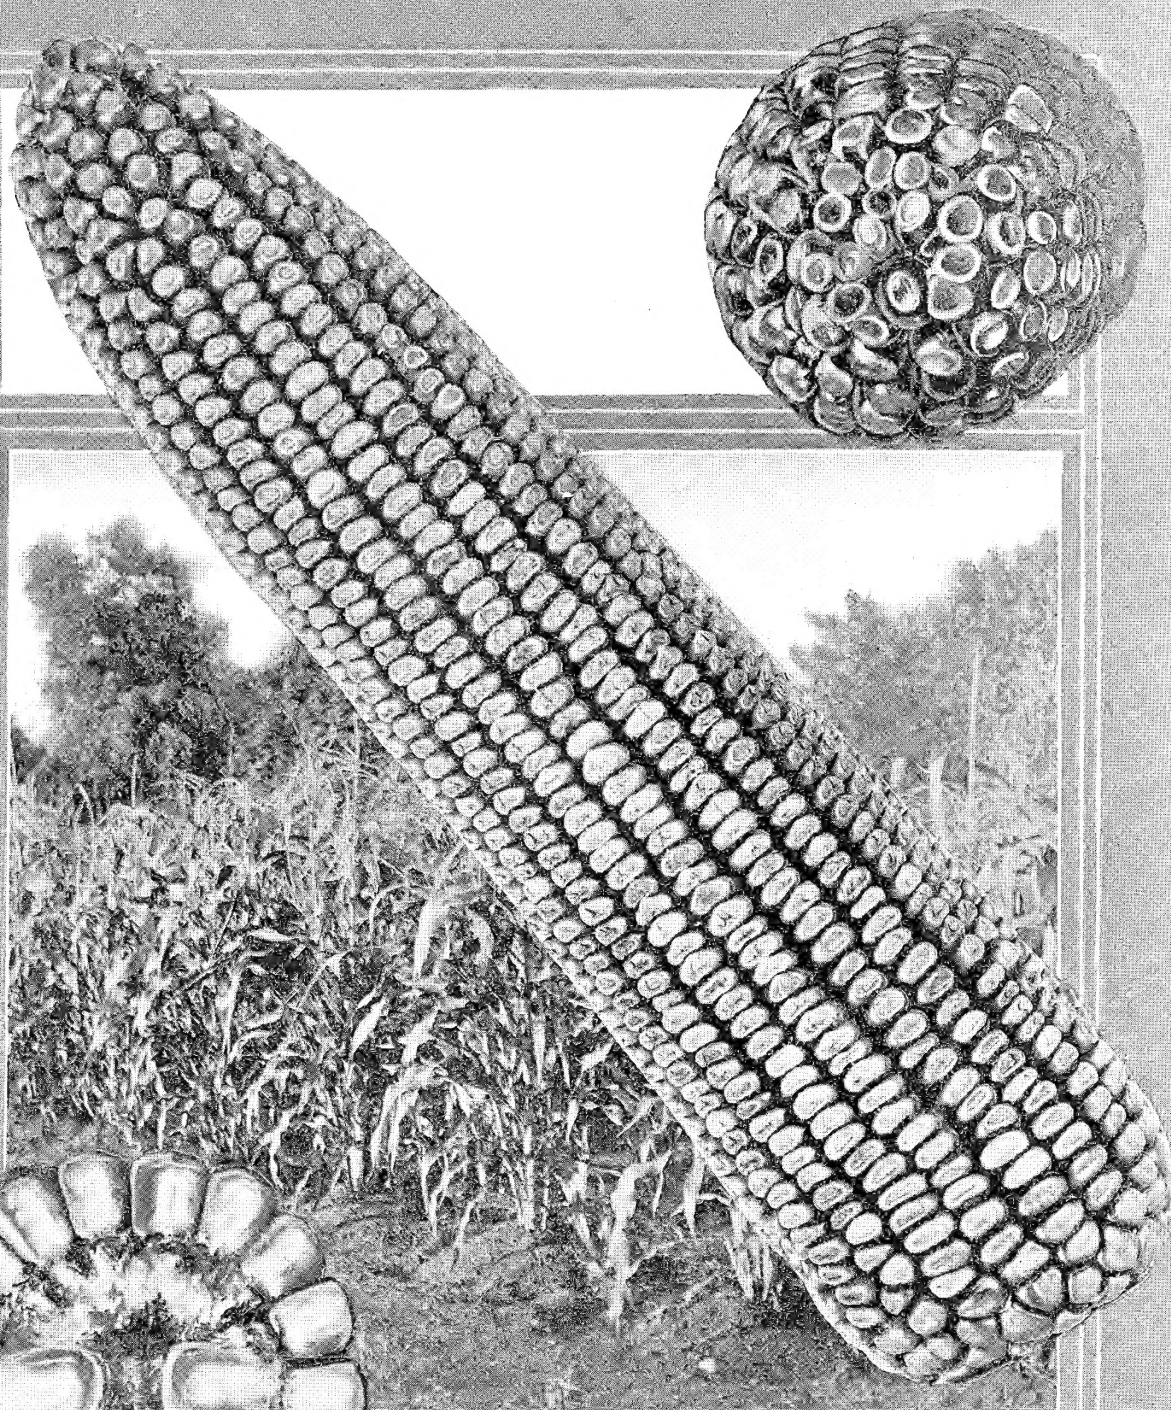

Whale Oil Soap. Caustic soft soap. Lb. 20 cts., 5 lbs. 75 cts., 25 lbs. \$1.75, 50 lbs. \$3.25, 100 lbs. \$5. Barrels of about 425 lbs. \$17.

Weed Killer. Killing weeds in walks and drives. Gal. \$1, 5 gals. \$4, 10 gals. \$7.50.

Worm Eradicator. For removing worms from greenhouses, lawns, flower-pots, without injury to the most delicate plants. Bottles 50 cts. and \$1.

CARBONDALE HYDROMETERS. For testing the gravity of Lime sulphur solution. Price 85 cts. (post-paid \$1.00), with directions.

LONG'S CHAMPION YELLOW DENT CORN

Grown direct from original stock secured from
Mr. Isaac Long, of Lebanon County, last year.

Yielded this year 119 bushels to acre planted 36 inches between the
rows and 20 to 24 inches in the row, on May 15th.

Ears 12 to 14 inches, 18 to 22 rows, set medium on stock. For prices
and description see page 24

HOLMES SEED COMPANY, Harrisburg, Pennsylvania.
